

2-DAY PIC MICROCONTROLLER: HANDS-ON WORKSHOP

29th – 30th September 2012

Details of the course are as follow:

Title	: 2-Day PIC Microcontroller: Hands-on
Date	: 29 - 30 September 2012
Venue	: - to be confirmed - (around UTM Johor)
Time	: 9.00am-5.00pm
Included	: Lunch
Fee	: RM120 (for UTM's participants only)
Facilitator	: Dr. Yeong Che Fai
Note	: - Bring your own laptop (not MAC).

If you are interested, please register with payment to:

Mr Goh Chok How, Hisyam Abdul Rahman or Tey Wei Kang
P08-108, Faculty of Electrical Engineering
Universiti Teknologi Malaysia.
Email: how_0718@hotmail.com
Mobile Number: **012-6580462**

*This two-day course aims to equip participants with the fundamental understanding skills needed to **construct and program a PIC microcontroller**. During the hands-on session participants are given opportunities to build and program their own PIC circuits to sharpen their programming skill and unleash their creativity. Elementary to intermediate projects such as led blinking to motor control are introduced. Participants are also guided in datasheet interpretation, circuit trouble shooting and components selection.*

Dr Yeong has conducted this course more than 30 times for engineers, academic staffs, postgraduates and undergraduates. This course is suitable for participants who are in engineering course, computer science or carry out research works.
